Projects

Real Time Face Recognizer Project | Python, Computer Vision, Machine Learning, MySQL

2024

- The project deals with detecting and recognizing faces of registered users in real-time from video feed, and once recognized, updates in a database(MySQL) with the date and time the user was detected.
- This project employs a LBPH (Local Binary Pattern Histogram) model to perform the facial recognition.
- This project can be used to provide effective real-time face recognition for security applications by accurately tracking and logging individuals.
